

The directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directive 2011/65/EC updated by directive 2015/863/EC) was adopted by the European Parliament and the Council of the European Union to prevent pollution caused by the presence of hazardous substances in specific classes of electrical or electronic products. This RoHS Declaration is available from the download center of IMERYS Graphite & Carbon's website at www.imerys-graphite-and-carbon.com.

IMERYS Graphite & Carbon products are not directly addressed by the RoHS Directive and compliance of the final homogenous materials incorporating our products shall be assessed by the concerned economic operators defined by the RoHS Directive. None of the banned substances listed in the RoHS directive are intentionally added/used by IMERYS Graphite & Carbon in any of its products listed herein. However, analyses nevertheless were performed at an independent external laboratory on representative samples from each product category. The concentrations reported in this RoHS Declaration (the IMERYS Graphite & Carbon Maximum Results) are the highest values measured for each substance among all the grades analysed. This RoHS Declaration is intended as information for RoHS compliance purposes only and shall not be used for any other customer requirement.
